

Aconex Connected Cost

Integrated Cost and Schedule to Drive Project Delivery

There's a Better Way

Current project control approaches are flawed, wasteful and not sustainable. Most are legacy solutions from yesterday's technology companies and not fit for purpose – generic at best. These sleepy incumbents' products are disconnected, have poor user experiences not to mention are costly and time consuming to deploy.

Leading companies are demanding a collaborative project controls solution to provide a complete view of cost information across both individual projects and portfolios. And they want time-to-value as quickly as possible.

What's the Challenge?

You're being held back from success whether through a legacy technology or a homegrown application. Like most project controls professionals you have to cope with many challenges including...

Siloed information: I no longer want my teams to have to chase information across organizations and applications, it slows down the discovery of issues that can drive up costs and delay schedules

Manual updates: Help me escape spreadsheets! They introduce errors and duplication that can jeopardize both data integrity and version control. And my job.

Poor visibility: Why am I constantly being blindsided due to a lack of accurate, real-time information? I need to measure performance against budget in a meaningful and proactive way.

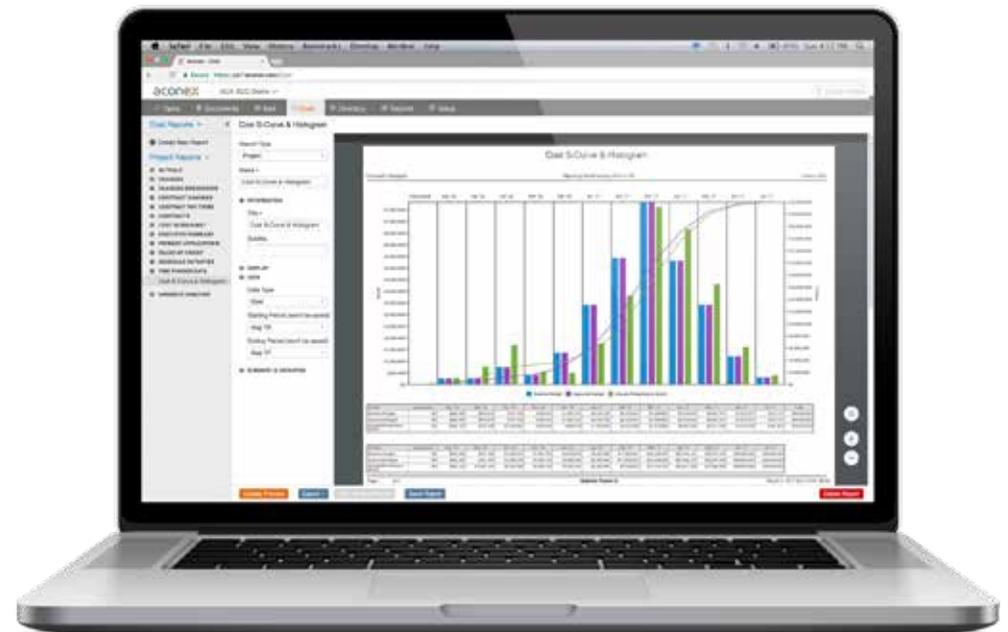

Take a Stance, Demand More

It's time for change. Avoid cost overruns, delayed schedules and the hassles that come with inferior, outdated technology. Adopt a modern project controls platform. Aconex offers a unique solution to the growing complexity and risk associated with all types of projects...

Platform: All project participants are connected on a single, modern platform following a consistent set of processes throughout the project lifecycle. We've found that many providers of legacy products are reducing product investment and struggling with customer support issues.

Enterprise: Connected Cost is fast to provision, deploy, and highly scalable and configurable for your specific processes. It's easy to learn and use. Consultants need not apply. We don't burden clients with lengthy custom configurations or rigid, out-of-the-box configurations.

Neutrality: With the secure Aconex platform, all participants – owners, contractors, subcontractors, etc. – control what information they share, if and when they share it, and with whom they share it. Access neutrality creates and sustains a culture of trust.

Trust Us...70,000 Organizations Do

From the asset owner to the subcontractor, everyone benefits as improved information flow leads to better decision-making and better deployment of capital and resources. With more than 70,000 user organizations and over \$1 trillion of project value delivered in more than 70 countries, Aconex is the industry's most widely adopted and trusted platform.

Connected Cost Key Capabilities

Budgeting & Forecasting: Gain visibility into the final outcome, take corrective action before problems occur.

Cost Worksheet: Track and report on project details with unlimited work breakdown structure elements, control accounts, and work packages.

Direct Actuals: Manage direct actuals, such as payroll and other spending, across cost, hours, and quantities against the budget.

Schedule Integration: Keep budgets and schedule in sync using one-click integration with Oracle Primavera P6.

Earned Value Management: Use earned value methods to forecast your costs, such as Cost Performance Index (CPI), Schedule Performance Index (SPI), and other tools.

Contract Administration: Manage contracts and changes with ease. Free up busy construction professionals to spend less time extracting cost inputs from correspondence and more time on high value work.

Changes: Process requests, reviews and approvals for contract changes.

Progress Payment Applications: Standardise payment process for your staff and downstream contractors.

Reporting: Track portfolio and project performance with real-time cost tracking and variance analysis, including progress across hours worked and quantities installed. Quickly and easily build and customise contract reports via our point-and-click report builder.

Integrations: Integrate contracts and payment apps into your corporate finance system.

Predictive Insight: Extract learnings from past projects so that you can deliver more efficiently and effectively on your next project.

The Aconex Difference

Fast to deploy, easy to adapt

With no hardware or servers to maintain, you can deploy Connected Cost in days or weeks to any project type. Connected Cost supports every project role, contract type, complexity level, and delivery method. Configuration without code means that you can easily adapt the system based on the needs of your next project, while IT can spend more time innovating.

Trusted Partner

Aconex has 16 years of experience across 16K+ projects solving the industry's top challenges. With frequent product updates, your organization will always be equipped with latest cost and contract management capabilities. We provide 24x7 service, support for the entire project team, and process mapping as part of implementation to ensure you are set-up for success.

Trusted Collaboration

Our unique security model ensures adoption, accurate insights, and fewer resources spent on litigation. There is no super user which means YOU own your own data. Information is private until shared, and we provide an unalterable audit trail.
